NH-7 Barnala Road Bathinda

Dr Saurabh Gupta
M.S, M.Ch (Plastic Surgery)

Ear lobe repair is a common surgery done by plastic surgeons. Now as ear lobe is a very vascular structure it bleeds a lot and it is difficult for the surgeon to see the margins and suture the wound margins accurately.

So, in my technique, I started using vascular bulldog clamps which came out to be very helpful as they provided me a completely bloodless operative field and I was able to suture accurately and which in turn led to a repair with minimal scarring.

Secondly, we don't need assistance with this technique.
